PIM SCHUMACHER

Stay playfull
After completing my studies in interior architecture and furniture design at the art academy in The Hague, I realized that I am not only a designer, but also an artist. Within my artistic practice, I explore how my ideas and stories can be expressed through different media. I illustrate and sculpt, and in doing so, I explore how I can evoke a feeling in others through colour and material. I do this by playing with abstraction, minimalism, and surrealism.
