BAS DE BOER

My sculptures are a collage of spatial models, which are characterized by their unfinished sketchiness, which hopefully creates a vitality and a way to create a constant renewal of themselves. The works are a cyclical incorporation and digestion of his previous self, often loud and smoky manifestations, scale sketches, made with all kinds of moving transformed (household) appliances. This apparatus turns into a chaotic repetition of image and sound, like a dog chasing its own tail. The sculptures are documented on video and this is the only remnant. The videos are in turn incorporated into one continuous video collage, a self-renewing Compilation Video.
