## JAN WILLEM VAN SWIGCHEM

Hi, my name is Jan Willem van Swigchem, i am a versatile artist. My trademark is creativity. As a self-made artist I create surprising designs with original starting points & perspectives. I've always had an eye for the unusual, I have developed several techniques myself. What's more, all my pieces are unique... as no two leaves of a tree are the same. This own design style guaranties the customer a unique product. As an artist I produce work in the following disciplines: • paper reliefs, templates and mixed media • applied art: surface design and (special)graphic design • photography: nature, architecture and abstract • Besides all this I am a music teacher I create paper art, mathematically inspired and very precisely executed. People often do not believe they are handmade. By inspecting them closely you will see minimal imperfections. My art originate purely intuitively. Applied art: I produce computer generated surface design. These designs can be printed on all kinds of surfaces. With the current technology, almost anything is possible. I sell my designs for application on textiles such as upholstery, tableware, glass bowls, table tops. All design is unique, produced on demand as one of a kind. Personal or corporate series on demand are possible as well. Please feel free to contact me.
