## SIMONE TEN BOSCH

The meaning of life, and it is already running, just that you passed

In light of the recent circumstances in which the world was transformed, and the Covid19, there have been changes in motion, and everyone around the world. For me, it means that I get to have my atelierwerkzaamheden, I was able to step up. With the freed up time has lead to a re-examination in the material waarin I am a graduate in 1982. In the last few years, I work in blocks of time. There was a time when the lighting of the eARTHpear, in which a variety of materials and techniques will be discussed for a time, the textiles, the work of the "Community of Senses", and most recently, there is a block of time, added to which the glass-ceramic objects, ontstaan...De the source of my work is of the nature to which the human plays a central role. The actions of the human being as a part of the natural world. Your whole life has been a source of inspiration, from which I can work with. Whether it's out of my immediate surroundings or from far away, it's going to be in the movement, and the creation of things that are not commodities. . It's tiny, but life-threatening virus has given us a mirror held up to us in our fragility exhibited in all of our rooms. and around the world. It is the vulnerability and the beauty that it was like a song, dance and poetry, in the windows and on the balconies, a globally shared, it has given me inspiration to get closer to the things that are important to me to be in good standing in the society..to make it my way so that I have time, energy, and focus can be put into the meaningful things in life. Many of you will have noticed that we are rushing yachts are racing to meet the most demanding social obligations to stay compliant. In the last few months, it wasn't us. There was no money for lots of people and showing off, was temporarily necessary. The virus has taken me to new paths in my way of thinking.Trails are old roads branch off, and me, together, swinging by a new one to capture the landscape's lead. A landscape that I would like to share with other artists. even though it is still at an early stage, projects will have to become a part of my role as an artist in our ever-changing society. What we have that's visual is going to cause a surprise, as you may have noticed that we're suddenly in for some big surprises are when wereldwezens.
