JANE CHIN-A-FO

Photographer with a poetic visual language

With the gaze of a stranger, I am looking for what makes a place a home. Home is not necessarily a physical place, but home is where memories and desires intersect. These are moments that come on suddenly; inspired by, for example, light, shadow or a certain perspective. These fleeting moments are captured with my camera so I can experience them for as long as possible. With this I address the social theme of 'Belonging'.
